

DNCR Responses to posed questions regarding project #CAP2610.

MWSP_SGS_RFB04-22-26-(002) dated April 22, 2026.

1. Survey Plan Availability:

A current survey plan outlining the State Park boundaries is available and can be provided upon request.

2. Previously Identified Areas of Concern:

Some contamination sites are known and DNCR will provide the relevant information. Most of these locations were contaminated prior to DNCR ownership.

3. Groundwater Expectation:

Groundwater is generally not expected within the overburden due to thin soils and shallow bedrock, although isolated perched water may be encountered.
