

Discover the Power of Parks Programs

Raptor Racket

Learn how to identify different birds of prey based on their calls.

Beaks, Feet and Feathers

Discover some of the unique traits that make raptors successful predators.

Migration At Miller

Come see the paths that raptors use to migrate and find out why they come to Miller State Park.

Name that Raptor

Do you think you can identify some of the birds of prey that visit Pack Monadnock? Join Ranger Rebecca and put your knowledge to the test!

Leaving the Nest

Are all bird nests the same? Discover the unique architecture of nests, and the different nesting habits of birds.

Fire Tower Fun

Join Ranger Rebecca and find out the interesting history behind the creation of fire towers and how their purpose has shifted over time.

Fall Foliage

Learn why the leaves change color in the fall and why New England is the perfect place for leaf peeping.

All About the Autumn Equinox

Visit Miller State Parks for the autumnal equinox and Ranger Rebecca will explain what an equinox is and why the earth has one.

Who Hibernates?

Once the leaves begin to fall, we all begin preparing for winter. Discover which animals hibernate for winter and other adaptations help animals survive the cold.

What's Over There?

Explore the summit of Pack Monadnock and discover the local landscape.

Bugs Be-Gone

If you have ever wondered why there aren't as many bugs in the fall? Come see Ranger Rebecca to find out why.
