

Discover the Power of Parks Programs

Beach Invasives

Come visit the interpretive rangers' table and participate in activities all about invasive species. Come by, say hi, and learn about what invasive species are, or learn which local plant and animal species are invasive.

Tide Pooling

Come explore the creatures that live among the rocks and tide pools. Learn how these organisms have adapted to survive in an ever-changing environment.

Leave Only Footprints

Join us at our table to see what trash we collected from the beach and natural items that like to be left alone. We will discuss simple practices (leave what you find, and pack in, pack out) that help keep the beach a healthier place for both humans and nature.

Seacoast History

Learn about the from Native American history to modern day of coastal New England. There will be some arts and crafts, and photographs.

Sharks

Come by and ask the Seacoast Interpretive Rangers all your burning questions about this region's most feared animal! We will have an activity that will help us relate to these mysterious, rarely seen animals.

Explorer History

Paying Homage to John Smith, the man who named New England, the rangers will share more details about the region's first colonial explorers and how their impact is still felt today.

Harboring Invasives

Stop by and learn about the non-native plants and animals that are invading the Seacoast harbors and how we are mitigating them.

Presented in collaboration with the Student Conservation Association and made possible by financial support from Eversource.
