

Tarp Tents!

How to Set Up:

Step 1:

Find two trees that do not have any loose branches above them (safety first!).

Step 2:

Tie a rope or string between the two trees. The height you choose is up to you, try different heights to see which one is best! I recommend starting out with the string being around chest height.

Step 3:

Place your tarp evenly over the rope.

Step 4:

Tie rope to the corners of your tarp and use stakes, or pieces of wood, to stretch the tarp out.

Step 5:

Place your hammock, sleeping bag, or blanket under the tarp and enjoy!

Tarp Tent Safety

1. When you are setting up the tarp be sure to have an adult present to help.
2. Never camp without an adult.
3. Do not build any fires under your tarp.
4. Make sure there are no dangerous branches above your tarp.
5. Make sure there is nothing dangerous near your tarp.
6. If you hear thunder, go inside.
